## BUSHMASTER 6.8mm SPC RIFLE & Upper Assembly

This gas operated semi-automatic packs a bigger punch than our 5.56mm/.223 models – a .270 cal. 6.8mm SPC (Special Purpose Cartridge) specifically developed for the military, but now available commercially. Velocity averages a bit over 2600 FPS (with Hornady 115 Gr.V-Max), and the heavier bullet weights deliver a terminal energy capable of bringing down larger game - making this a very good deer cartridge. The 6.8 mm SPC was developed from a .30 Remington case which is shortened slightly to fit the AR15 type magazine. Due to the “fatter” case diameter, magazine capacity in a 30 Round AR type shell is reduced to 26 Rounds, and 6.8 specific springs and followers are used. The bolt is also different - due again to case diameter (take care not to interchange a 5.56mm/.223 bolt with a 6.8mm SPC bolt).

Both Complete Rifles, and Barreled Upper Receivers (with Magazine), are available. The Uppers will fit on, and work with, any military pattern 5.56mm/.223 caliber Lower Receiver. Complete Rifles are shipped with one 6.8 SPC magazine, a black web sling, Operators Safety Manual and orange safety block in a lockable carrying case. Upper Receiver / Barrel Assemblies include a 6.8 SPC specific magazine.

**6.8 SPC Caliber A2 Type Rifle**  
(Part #BCWA2F 16M468)

**6.8 SPC Caliber A3 Type Rifle**  
(Part #BCWA3F 16M468)

**6.8 SPC Caliber A2 Type Upper**  
(Part #BURA2B 16M468)
